PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer** with **2+ years of professional experience** in designing, developing, and maintaining scalable enterprise applications. Currently working at **Cognizant** as a **MERN Stack Developer** since **Jan 2025**. Skilled in **MongoDB, Express.js, React.js, Node.js, REST APIs and Agile methodologies**. Strong expertise in backend development, responsive UI design, API integration, debugging, and database optimization. Proven track record of optimizing API performance by 20% and implementing secure JWT-based architectures for enterprise retail and banking solutions.

TECHNICAL SKILLS

Programming Languages :	Frontend Technologies :	Backend Technologies :	Databases :
• Java Script (ES6+) • TypeScript • Core JAVA	• React.js • Next.js • HTML5 • CSS3	• Node.js • Express.js • REST APIs	• MongoDB
			Cloud & Deployment: • AWS(S3/EC2/RDS) • MongoDB Atlas • Git & GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer | **Cognizant, Pune** Jan 2025 – Present

Key Contributions & Achievements:

- Developed scalable enterprise-grade web applications using React.js, Node.js, Express.js, and MongoDB.
- Designed responsive and reusable UI components using React.js, HTML5, CSS3, and TypeScript.
- Built and maintained scalable REST APIs for enterprise applications and client systems.
- Implemented authentication and authorization using JWT based security mechanism.
- Developed CRUD functionalities and integrated backend APIs with angular frontend modules.
- Optimized MongoDB aggregation pipelines, reducing data retrieval time by 35% for high-volume retail transaction.
- Integrated 3+ external business services using REST APIs, improving system interoperability and reducing manual data entry by 15%.
- Performed debugging, issue resolution, and production support activities.
- Participated in Agile ceremonies including sprint planning, standups, and retrospectives.
- Collaborated with QA, UI/UX, and DevOps teams for smooth deployments and delivery cycles.
- Maintained code quality using Git version control and peer code reviews.

PROJECTS

Retail Sales & Inventory Management System | MongoDB, Express.js, React.js, Node.js, REST APIs Aug 2025 – Present

Client: Global Retail Chain (USA)

Description : Developed an enterprise retail management platform to handle sales transactions, inventory tracking, billing, supplier management, and executive dashboards across multiple store locations.

Responsibilities:

- Designed and developed scalable backend APIs for products, billing, sales and inventory modules using Node.js and Express.js.
- Developed React.js dashboards for stock monitoring, sales analytics, and KPI reporting.
- Designed MongoDB collections and Optimized aggregation pipelines, reducing data retrieval time by 35% for high-volume retail transactions.
- Implemented real-time stock updates across multiple warehouses.
- Integrated barcode scanner and invoice generation modules.
- Improved system performance and reporting speed.
- Worked collaboratively in Agile sprints with cross-functional teams.

INTERNSHIP

Creazione Software	Java Software Developer Intern	June 2024-Dec 2024
• Developed and deployed Java applications, focusing on backend development using Core Java, JWT and JDBC. • Improved code efficiency by 30% through algorithm optimization and object-oriented design principle. • Implemented RESTful APIs and enhanced performance, reducing API response time by 20%. • Collaborated with senior developers in Agile sprints to design and implement scalable modules. • Applied best practices in exception handling, multithreading, and file handling for robust applications development. • Built dynamic user interface using HTML, CSS, JavaScript for interactive web applications. • Managed version control with Git and collaborated on GitHub for real-time project coordination.		

Secure Banking Application	Java, Spring Boot, MySQL, React.js	2024
• Implemented multi-factor authentication (2FA) increasing account security by 99.7%. • Optimized login processing time by 40% while supporting 1,000+ concurrent users. • Applied AES-256-GCM encryption for 50,000+ sensitive records. • Built JWT token rotation system with 15-minute expiration reducing session hijacking risks by 90%. • Developed responsive frontend using React.js with seamless user authentication flow.		

EDUCATION

Sandip University, Nashik	2022 – 2025
B. Tech - Computer Science and Engineering - CGPA - 7.28	Nashik, Maharashtra
Government Polytechnic, Nashik	2019 - 2022
Diploma - Computer Engineering - CGPA – 8.03	Nashik, Maharashtra

EXTRACURRICULAR

- University Cricket Team Member - Represented university in The Association of Indian Universities (AIU) West Zone Inter-University tournaments.
- Best Bowler Award Winner - State Tournament 2023, Goa.
